

ROHITH V RAJ T M

UX Designer | Product Designer | Educator turned Practitioner

rohith.rohith.vraj@gmail.com | Pune, India

LinkedIn: [rohithrvr](#) | Portfolio: <https://www.behance.net/rohithvrajtm>

Summary

Product Designer with 4+ years of experience across UX design, applied research, and product strategy. Experienced in leading end-to-end design initiatives—from user research and problem framing to prototyping and usability validation—across digital and physical products. Strong background in design leadership, cross-functional collaboration, and translating complex requirements into intuitive, user-centered solutions.

Skills

- Product & UX Design: User Research, Usability Testing, Personas, Journey Mapping, Information Architecture, Interaction Design, Wireframing, Heuristic Evaluation, Accessibility
- Prototyping & Systems: Low & High-Fidelity Prototypes, Design Systems, Component Libraries
- Tools: Figma, Framer, Miro, Adobe XD, Sketch; Unity, ShapesXR (Immersive & XR workflows)
- Leadership & Collaboration: Design Leadership, Design Mentorship, Project Ownership, Stakeholder Communication, Cross-functional Collaboration

Experience

MIT Academy of Engineering | Pune
Assistant Professor
UX & Product Design

Jun 2023 - Current

- Led 15+ end-to-end UX projects involving user research, problem framing, ideation, prototyping, and usability testing
- Functioned as Design Lead and Product Owner for multidisciplinary teams, facilitating design sprints, critiques, and iterative validation cycles
- Designed and shipped the School of Design website and complete visual identity for the annual degree show “UNTITLED 2025”
- Guided teams to state-level recognition at the Aavishkar Research Competition through structured user-centered frameworks
- Enabled innovation outcomes including 4 patent filings and 1 registered design, promoting IP-driven product thinking

ImaginXp/ College Dekho | Mangalore, Raipur
UX Designer | UX Faculty

Jun 2022 - Jun 2023

- Delivered hands-on UX design programs focused on real-world problem solving and industry-aligned workflows
- Conducted practical workshops on Figma, usability testing, journey mapping, and heuristic evaluation
- Mentored capstone UX projects addressing user, business, and system-level challenges
- Collaborated with academic and industry stakeholders to align design outcomes with real product expectations .

Society of Innovation of Design (SID) |
IISc Bangalore
Design Intern

Jun 2021 - Aug 2021

- Conducted user research to identify usability and performance issues in oxygen concentrator accessories during the COVID-19 pandemic
- Led usability testing and iterative design improvements for inlet filter systems
- Collaborated with engineering and interface design teams to deliver solutions adapted to Indian environmental conditions
- Contributed to improved reliability and usability of critical medical equipment

Hoyasan Labs | CPDMeD, IISc Bangalore
Product Design Intern

Dec 2021 - May 2022

- Contributed to the design and development of an Antiviral Face Mask utilizing an IISc-developed antiviral material, supporting product development from concept through prototyping.
- Designed product packaging for medical and healthcare solutions, balancing usability, branding, and manufacturing considerations.
- Worked on the development of a Light-Based Therapeutic Goggles Prototype for Alzheimer's care, contributing to product design, prototype development, and iterative design improvements.
- Collaborated with multidisciplinary teams to develop innovative medical device concepts, applying user-centered design principles throughout the product development process.

Education

Indian Institute of Science, Bangalore

M.Des in Product Design And Engineering

Oct 2022 | 8.3 CGPA

- Capstone Project – Compact Sisal Fiber Extractor: Led user research, concept development, embodiment design, CAD modeling, prototyping, and testing to develop a compact sisal fiber extraction and combing system aimed at improving efficiency and accessibility for small-scale users.
- Industry & Institutional Projects: Collaborated on multidisciplinary design projects with startups and research initiatives through the Centre for Product Design and Manufacturing (CPDM), gaining hands-on experience in product development, design thinking, and cross-functional teamwork.
- Branding & Visual Communication: Designed the visual identity for the CPDM Silver Jubilee celebrations, including event branding, graphic assets, and commemorative memento design, ensuring a cohesive and impactful brand experience.

Government Engineering College, Kozhikode

B.Des in Mechanical Engineering

Jun 2019 | 7.01 CGPA

- Thesis: An Efficient Method to Extract Energy from Railway Vehicle-Induced Vibrations.
- Core member of the college media team; worked on brand identity and freelance projects in 3D modeling and visual design

Projects

User Experience Design

Fondle App: Pet Care Service & SaaS Platform

A unified pet-care ecosystem connecting pet owners with care professionals, supported by a dedicated SaaS platform for service providers.

- Designed pet-owner journeys for service discovery, booking, payments, and communication.
- Designed the provider SaaS for availability, bookings, sessions, earnings, and analytics.
- Created end-to-end service and booking workflows across both user ecosystems.

Naksha: An AR integrated Toy experience

Conceptual product design project

- Designed a jigsaw-based topographic toy system paired with an AR mobile application
- Focused on storytelling, collaborative play, and immersive engagement
- Integrated physical and digital interaction for enhanced learning experiences

Product Design

Sisal Fiber Extractor

- Designed a compact fiber extraction and combing system
- Conducted field research with farmers and processing units
- Improved usability and operational efficiency through iterative prototyping

Oxygen Concentrator Inlet Filter Redesign

- Led user research and usability testing
- Identified clogging and airflow issues
- Developed an improved inlet filter design in collaboration with engineering teams

Certifications & Accomplishments

- Project Management for UI UX - Udemy
- UI/UX Training: ImaginXp Faculty Development Program & Capstone Project
- AutoCAD 3D Mechanical, SolidWorks 3D Modeling – CADD Centre, Kerala
- 4 Patents Filed | 1 Design Registration (IPR)
- Mentor recognition at Aavishkar Research Competition (State-level representation)
- Anthropic - Claude Courses on AI Fluency, Claude 101, etc.,
